Ozone technology for laundry

## A BREAKTHROUGH IN THE COLD WATER WASHING BY THE OZONE TECHNOLOGY

Ozone actually penetrates the fibres of your linen and prevents residue build-up in the weave of the linen.

**Ozone is an oxidising gas** who will improved cleanliness, enhanced whiteness and colours and a high level of disinfection.

### REDUCE WATER USE

The high level flush and one high level rinse are removed resulting in up 50% water savings.

### REDUCE ENERGY USE

A cold water washing (no heating), a shorter and a better drying cycle reduce the machine operating hours. Up to 90% consumption of energy reduction.

### LINEN LIFE INCREASED

Reduce number of washing from 3 to 1 . It preserves the quality of the laundry and it's suitable for residential laundry, catering to quilts.

**PRODUCTIVITY SAVINGS OF UP TO 30%**

**ENVIRONMENT BENEFITS**
